

# ASBEEZ POS — DEVELOPER HANDOFF BRIEF

## ## What We Are Building

A production-grade POS platform with inventory, accounting, loyalty, and governance controls.

## ## Core Philosophy

- Append-only ledgers
- Reversals, not edits
- Inventory moves only
- Period locking
- Mandatory audits
- Loyalty, not income

## ## Sprint 0 Focus

Sprint 0 builds rails, not features.

## ## Definition of Done

- Cannot bypass controls
- Cannot backdate
- Cannot mutate ledgers
- Cannot double-post events

## ## Evaluation Criteria

- Correctness
- Safety
- Test coverage
- Long-term maintainability

## ## Final Note

If the system requires manual data fixes, the design is wrong.
